SUMMARY

Second-year Computer Science undergraduate specializing in Flutter and Firebase development, with hands-on experience building production-grade, AI-integrated mobile applications. Lead developer of a disaster-relief platform recognised in the Top 106 (out of 85,000+ teams) at Google Solution Challenge 2026. Seeking a Flutter/Firebase developer internship.

EDUCATION

B.Tech in Computer Science & Engineering

Guru Tegh Bahadur Institute of Technology (GTBIT), Delhi

Expected 2028

CGPA: 8.563

XII (Higher Secondary) – CBSE, Guru Harkrishan Public School, Loni road

78%

X (Secondary School) – CBSE, Guru Harkrishan Public School, Hargobind Enclave

92.6%

TECHNICAL SKILLS

- **Languages:** Dart, Java, C, JavaScript, HTML/CSS, SQL
- **Mobile Development:** Flutter, Android App Development, Cross-platform (Android & Windows)
- **State Management & APIs:** Provider, SharedPreferences, REST APIs, Gemini AI API, Google Maps API, Google Places API
- **Backend & Database:** Firebase Firestore, Firebase Auth, Firebase Storage, Cloud Functions, Hive (NoSQL), PostgreSQL
- **Web & Full-Stack:** React.js, Next.js, Node.js, Express, AWS
- **Tools & Platforms:** Git, GitHub, Android Studio, VS Code, Linux (Mint), Bash

MAJOR PROJECTS

ReliefNet

Flutter, Firebase, Gemini AI, Google Maps API, Provider

[GitHub](#) | [Live](#) | [Certificate](#)

- Lead developer of a production-grade AI-powered disaster relief platform submitted to **Google Solution Challenge 2026**; achieved **Top 106 out of 85,000+ teams globally**.
- Built the full Flutter mobile app on a 3-member team; designed Firestore data architecture, Gemini AI integration, and a web-based NGO admin panel from scratch.
- Built a real-time crisis dashboard using Firestore StreamBuilder with urgency filtering and Haversine-based GPS sorting (nearest / latest / most-urgent) from live device location.
- Integrated Gemini AI to automatically analyse every submitted disaster report — generating a situation summary, 3 actionable solutions, required volunteer skills, and priority level.
- Engineered a 4-stage volunteer task workflow (Assigned → En Route → On Site → Done) with 1 km GPS geofence arrival confirmation and mandatory photo/video proof via Firebase Storage.
- Implemented offline report queuing with local persistence and automatic Firestore sync on reconnection, ensuring zero data loss in disaster zones with degraded connectivity.
- Designed role-based access control (Reporter / Volunteer / NGO Admin) with Firebase Auth and a multi-modal AI credibility engine to filter spam reports before coordinator review.
- Developed a web-based NGO admin panel (HTML/CSS/JS + Firebase) for real-time report monitoring, volunteer management, regional broadcast alerts, and platform analytics.

Simplist — Cross-Platform Task Manager

Flutter, Dart, Firebase, Hive, Notifications

[GitHub](#)

- Built a cross-platform productivity app (Android & Windows) with Firestore real-time sync across devices and local offline persistence via Hive NoSQL.
- Implemented due date scheduling with local push notifications using `flutter_local_notifications`, demonstrating platform-channel integration on both Android and Windows.
- Shipped production builds for both platforms with a modular widget architecture; released APK and Windows installer on GitHub.

ACHIEVEMENTS

- **Google Solution Challenge 2026 — Finalist Top 106:** Selected among the Top 106 teams out of **85,000+** registrations and **6,700+** prototype submissions. Recognised for real-world humanitarian impact and technical innovation in disaster response. [Certificate](#) | [Verify](#)
- **Data Structures & Algorithms:** Solved **38+** problems in Java on LeetCode (leetcode.com/ramanexo), spanning Arrays, Two Pointers, Strings, Hash Tables, and Dynamic Programming, following Striver's A2Z DSA Sheet.
- Maintaining a CGPA of **8.563** in B.Tech CSE at GTBIT, Delhi; scored **92.6%** in Class 10 CBSE.
